

All About Lakes, Rivers & Fly Fishing Too!

Niche

Draw the following fish in the location which shows where they spend most of their time.

Trout: moves quickly, mouth designed to catch and eat insects and smaller fish.

Burbot: moves slowly, large mouth designed to catch whatever may come near, extra body fat.

Northern Pikeminnow: moves slowly unless catching prey, large mouth to catch small fry

Longnose Sucker: moves slowly, mouth on bottom of head, mouth designed to scavenge off the bottom
