

# All About Lakes, Rivers & Fly Fishing Too!

## Caddis Identification

After examining the physical features of the caddis fly at its **larva**, **pupa**, and **adult** stages, draw a picture of the caddis fly at each stage and put a written description by it.

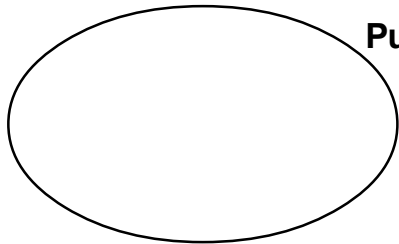

**Larve:**

---

---

---

**Pupa:**

---

---

---

---

**Adult:**

---

---

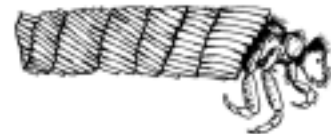

---

---

Several species of caddis flies, during the larva stage, build cases to protect themselves. They gather handy materials and cement them together with a “glue” they produce. Below are five examples. What material was used for each case?
